DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "enlarged diameter" recited in claim 1 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

2. A substitute specification in proper idiomatic English and in compliance with 37 CFR 1.52(a) and (b) is required. The substitute specification filed must be accompanied by a statement that it contains no new matter.

3. The disclosure is objected to because of the following informalities: on page 7, line 2, the specification recites "third cylindrical member 16". The third cylindrical member appears to be indicated by reference sign "17" and the cylindrical member 16 appears to be the "second cylindrical member".

Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 1-8 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claim 1 recites "a support portion having an enlarged diameter toward an inner circumference of said sleeve body is provided in a part of an outer circumference of said cylindrical member." The specification, on page 6, line 13 through page 7, line 7, appears to disclose annular passages between the cylindrical member and the sleeve body. How is the lateral position of the cylindrical member maintained in the sleeve body?

Claim 8 recites the limitation "cutaways" in line 1. The claim appears to be readable on the embodiment of figure 3. Claim 1 recites the limitation "an enlarged diameter" which appears to be readable on the embodiment of figure 1. Claim 1 does not appear to be a generic claim and the specification does not appear to disclose an embodiment which is readable on claims 1 and 8.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

Claim 1 recites "a cylindrical member containing therein a pushing spring to said needle valve" in lines 3-4.

Claim 2 recites the limitation "the fuel to be fed" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Claim 3 recites the limitation "in the middle in the axial direction" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 7 recites the limitation "an injection mechanism" in line 3. This appears to be a double inclusion of the "needle valve" recited in claim 1.

Above are examples. Applicant is required to ensure full compliance with 35 U.S.C. 112, second paragraph.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3752

9. Claims 1-8 (as best understood) are rejected under 35 U.S.C. 102(b) as being anticipated by DeLuca (6,007,000).

DeLuca discloses a fuel injector comprising: a needle valve 11; a cylindrical member 3, 6, 8, 10, 18; a sleeve body 21; a support portion 18.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher S. Kim whose telephone number is (703) 308-8336. The examiner can normally be reached on Monday - Thursday, 6:30 AM - 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Henry C. Yuen can be reached on (703) 308-1946. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-7766 for regular communications and (703) 308-7766 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1113.
